FOR IMMEDIATE RELEASE

Scarff's Landscape Merging with GreenPro

Press release

New Carlisle, Ohio, 1/29/21— As the green industry looks forward to a busy Spring and warmer weather, much transition has been taking place at Scarff's Landscape. While our crews look the same as they have for almost 30 years in some cases, our business model is evolving. Starting this season we will merge with GreenPro Services Inc., a full service landscape and turf installation company which was also born of a merger. GreenPro focuses on providing a high quality landscape and turf packages for new homes in Southwest Ohio.

Scarff's Landscape has been working with current and past clients to transition our accounts over to GreenPro who will complete all existing and future work. As for our crew members, they will also, in most cases, make the transition onto a GreenPro team. The goal is to have no loss of jobs during this transition. This is an opportunity for us to focus our efforts and refine our work.

Over the next season, our focus will shift from our previous project types of custom design and build, landscape enhancements, and maintenance into the more specific type of work that GreenPro has mastered; working with new home buyers and builders to install a beautiful package to complete their ideal home. Through this transition, what will never change is the commitment to high level attention to detail that Scarff's has upheld along with friendly, small business customer service.

If you are a current or former client and you have questions about the transition, please contact us at info@scarffs.com or 937-748-1559.
